

OPLA Discord Server Setup

Click or use this hyperlink:

<https://discord.gg/s5qSdVKdtU>

You will be taken to a page that looks like this:

Temporary Member:

Our server is set up to allow you to be a temporary member: just type in a screen name, click Continue, join the server and don't verify your account by closing the rest of the prompts. You will be able to see how things look, read what is on there already, but will not be able to chat or contribute to the community. You also will need to complete these steps each time you come back.

Permanent Member:

If you would like to be a permanent member, setting up your account is easy. Put in the your display name and hit continue. You will be asked questions about your email and your birthday. Answer those questions, and then say to send you an email to verify your account. Once you verify your account via email you will be able to interact with the content on the server. You also will be able to download the desktop app, install the cell phone app, or just visit the community directly from your web browser.

Already Have an Account:

If you already have a Discord account, you can click the **already have an account** and add our server to your account.
